

BLUEPRINT

Consultancy

Cybersecurity made clear – and aligned with your business.

Security is not just a technical question. You need to know what to protect, against what, and at what cost. We help you set the strategy, priorities and processes so that security supports your business and meets regulatory requirements.

How we help

- risk analysis and prioritisation
- preparing for NIS2 and the Czech Cybersecurity Act
- building an information security management system (ISMS) based on ISO/IEC 27001
- security policies, procedures and business continuity plans
- security architecture design and technology selection
- ongoing advisory support for day-to-day decisions

How we work

- 1 We listen to understand your environment, goals and constraints.
- 2 We map the current state and the main risks.
- 3 We propose a realistic plan with clear priorities.
- 4 We help you put it into practice and review it regularly.

What you get

- a clear view of your risks and what to do about them
- documentation and processes that stand up to inspection
- recommendations tailored to your environment and budget
- a partner you can turn to whenever you need

AI

AI in practice We help you use AI safely – from rules for employees to preparing for the requirements of the EU AI Act.

Who it's for business leaders, IT managers and regulated organisations without an in-house security team.

Shall we discuss how we can help?
